

Whiteboard

Together from Anywhere

Secure. Inclusive. Scalable.

ENTERPRISE

What is Bluescape?

Bluescape is a virtual work platform that allows distributed teams to collaborate and communicate as if they were in-person. From whiteboarding to sales Bluescape is designed to connect workers with each other in any location.

Why Bluescape?

Bluescape's whiteboard isn't just about getting your team together for one meeting. It is the jumping off point for productivity in a digital first environment.

Bluescape provides all the whiteboard functionality you'd expect plus the ability to seamlessly transition to content creation, all within the same workspace. Keep the ability to maintain project momentum without having to switch applications.

Bluescape drives visibility across your organization by providing a persistent view of any workspace. Team members that didn't participate in an initial whiteboard session can catch up quickly without using additional team resources.

Bluescape enables enterprise user roles and permissions that unify global organizations. Access to data can be customized, and can work with existing tools.

Bluescape integrates with leading unified communications systems and content management systems out of the box. Conduct meetings and access all your files and applications within Bluescape.

Why remote workers love Bluescape:

Employees are no longer constrained to the physical environment. With Bluescape you can access your work and collaborate with your teams, no matter where you are.

"Using Bluescape helps create happy accidents. We learn through peripheral vision."

—Mike Avery, Co-Instructor, UPenn

Penn
UNIVERSITY OF PENNSYLVANIA

Who can use Bluescape in your organization?

Bluescape empowers you, your leadership and your colleagues across all departments, internally or externally, to see the big picture all together from anywhere. Dispersed teams and employees can gain access to virtual workspaces to facilitate remote visibility and interaction.
