

Addressing the Unpredictable Nature of Ever-Changing Events

Secure. Customizable. Scalable.

Situational Intelligence

- Is there a better way to work with your dispersed team and tools before, during, and after times of crisis?
- Do you need all mission critical information accessible from any device across your teams?
- Do you want to unify your existing and future applications and tools into one unified interface to aid in faster decision making?

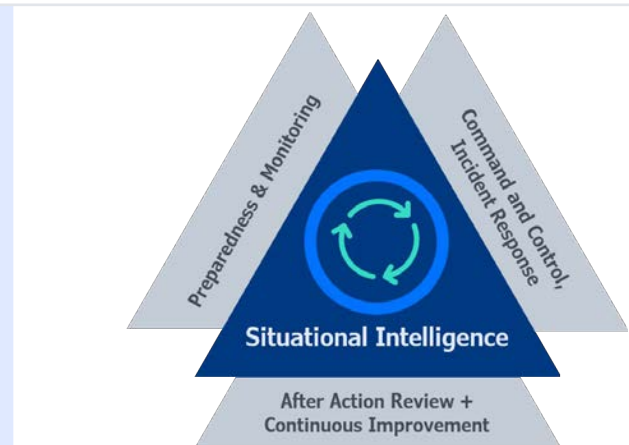

Organizations who use Bluescape for Situational Intelligence experience:

- ✓ A 30% reduction in time between key decision cycles.
- ✓ Faster awareness and a quicker response time to key events.
- ✓ Better intra-department communications.
- ✓ Improved remote working effectiveness.
- ✓ Higher employee engagement at all levels.
- ✓ A true “holistic” picture of an initiative that only comes from employing a true Situational Intelligence software application such as Bluescape.

Bluescape Offers:

1. Fidelity, Accessibility, and Action-ability with Virtual Workspaces
2. Customizable and Flexible Implementation
3. Extensible Security

Whether performing threat analysis, maintaining a Common Operating Picture with existing tools, managing a SOC/NOC, or responding to critical and unexpected incidents, Bluescape gives your teams the ability to maintain Situational Intelligence by visualizing your mission critical data from any location, unifying all sources of content to aid decision-making, with extensible security measures.
