

Bluescape + Security

Share, plan, and analyze with the confidence of enterprise-grade security

Collaboration and data sharing is essential for modern operations, but they can be hampered by security concerns. Bluescape is a visual collaboration solution authorized at both FedRAMP Moderate and IL4/IL5 for CUI. Now, you can bring data, tools, and expertise together in a virtual workspace to save teams time.

Trusted by commercial organizations, government agencies, and the Defense Industrial Base, Bluescape can be used by dispersed and remote teams or cross-functional groups to share, plan, and analyze data—for better and faster decision-making, real-time operations, and situational awareness.

Commercial users can use Bluescape with confidence, too. Our commitment to security meets industry needs and other compliance requirements.

- 100% clean audits; zero non-conformities, zero opportunities for improvement
- ISO 27001 certified, SOC2 Type2 certified
- Security Scorecard rated Bluescape 100 (January 2023)

SECURITY FOR TODAY'S MISSION

Bluescape is a single pane of glass solution that can pull multiple data sources into command processes—with the confidence of military-grade security.

- Trusted by federal agencies: DISA IL-4/5 certified and FedRAMP Moderate certified
- Complies with NIST CSF, NIST 800-171, FIPS 140-2, and ISO 27001
- Authority to Operate at the Top Secret Level
- Authority to operate in the U.S. DoD: NAVSEA ATO at IL4/IL5 for CUI and DISA ATO and Support for ITAR

PROTECT YOUR PEOPLE AND YOUR DATA

Bluescape meets compliance requirements for secure collaboration and information sharing.

- Visualization of multiple and disparate data streams, formats, and analysis
- Planning activities and scheduling
- Data and intelligence analysis
- Agile framework processes

COLLABORATE WITH CONFIDENCE

For end-to-end encryption:

- AES 256-bit data at rest and TLS 1.2+ data in transit
- Customer-managed encryption keys

ACCESS CONTROLS KEEP USERS IN THEIR ROLES

- SAML 2.0 Single Sign-On
- Multi-factor authentication
- Personal Identity Verification (PIV) Smart Card or Common Access Card (CAC) Authentication (HSPD-12 PIV/DoD PKI)
- Role-based permissions in the workspace (edit, view, customizable roles)
- Granular and attribute-based access control (XACML)
- Emerging features like hide and reveal content maximize and focus participation

FILL THE GAPS

Bluescape offers unique capabilities for government organizations:

- Only tool made for government Scrum Masters and Agile processes, including retrospectives and planning
- Fills the critical gap between MS Planner/Project and O365, particularly for projects and programs with outside stakeholders

THERE'S NO COLLABORATION WITHOUT TRUST

Bluescape was founded and is based in the United States. You can be assured that your data is stored securely in US-based data centers using industry-leading hosting providers.
