Mobile App Store Release Notes

Version July 29, 2019

Enjoy the enhancements we've made in this first wave of releases for our newly designed Bluescape mobile app:

- Quickly view a list of all of your workspaces
- Filter your workspaces by organization
- Search for workspaces by name
- Sort your favorite workspaces to the top of the list for easy access
- Send a workspace to a wall direct from your mobile device
- View a list of canvases within a workspace
- Search for specific canvases within a workspace by canvas name
- View all supported content within a specific canvas
- View all supported content within a workspace
- Search for your content by name and extension across all of your workspaces and canvases
- Preview canvas content in a list or in "canvas preview" mode
- Light and dark modes while in "canvas preview" mode
- Quickly swipe between content in both canvas and workspace content views
- Open and share/download your images and documents to your browser or any other app

About the Bluescape Mobile App

Bluescape gives teams a virtual workspace that is accessible and available anytime, anywhere. Bring in content, access web apps, sketch ideas, meet with the team, and more.

A scalable, cloud-based solution, Bluescape connects people across distances and disciplines so everyone can see and play with concepts, plans, and every iteration of those plans all in one easy-to-use, easy-to-access place where no idea is ever lost.

Bluescape Mobile serves as a portable companion to the Bluescape Enterprise software and provides a whole new way to experience your content inside of Bluescape. It enables you to quickly find and access your images, notecards, documents and more across all of your workspaces, while on the go!
