

Remote Learning

Together from Anywhere

Secure. Inclusive. Scalable.

EDUCATION

What is Bluescape?

Bluescape is a visual collaboration platform that enables teachers to post class content and interact with students in a lecture and small-group setting without needing to be in the same room.

Why Bluescape?

Bluescape is an easy, powerful, and fun solution for your school's remote learning requirements. Here's why:

-  **Bluescape allows** everyone in the classroom to view all your content side by side. By bringing content to the forefront it becomes the focus of your classroom efforts, and results in increased productivity and improved participation.
-  **Bluescape delivers** a persistent record of your learnings and communication sessions. This enables everyone to track the lesson processes from start to finish, so even if you're not in the classroom you'll still be in the know.
-  **Bluescape drives** awareness for faculty from lecture level to small groups to individuals. With everything in one pane of glass, staff knows what's going on at all times. When everyone on the team has access to all the up-to-date information, you keep moving forward and progress is always in real-time.
-  **Bluescape integrates** with leading with audio and visual systems, like Cisco Webex, directly into your virtual classroom. This allows you to keep your communication connected to your content, and results in effective remote collaboration by bringing your students, your content, and your communication together from anywhere.

Why Education loves Bluescape:

Whiteboard and securely interact with any app or any piece of content, side by side, from wherever you are, all to make collaboration more engaging, and work more fun.

*"Bluescape brings visibility.
Visibility brings accountability.
Accountability brings success"*

– Eric Anderson, Grand Valley State University
Labor & Employment Law

Who can use Bluescape in your organization?

Bluescape empowers you, your colleagues, and your students across all departments, internally or externally, to see the big picture all together from anywhere. Dispersed faculty, staff and students can gain access to virtual classrooms to facilitate remote visibility and learning.
