

Collaboration Solutions and Bluescape

Enterprises invest in meeting solutions, messaging solutions, cloud storage providers, and office suites. These tools increase the productivity of the individual, but they fall short when a team must join forces around a problem or decision. There are few options to bring a team together with the resources they need without getting everyone—and everything—together in the same room.

Bluescape delivers what video conferencing and enterprise messaging lack, an easy way for teams to gather around all of their content to see the big picture. Persistent, virtual workspaces help teams to collaborate more effectively, from anywhere, on any device, at any time.

Cisco Webex and Zoom

Add a Webex or Zoom call to your Bluescape meetings from Outlook. One click is all it takes to see your call alongside all of your content. Communicate with colleagues and collaborate around your work without dividing attention across multiple applications.

Box, Dropbox, Google Drive, and OneDrive

Bluescape integrates with cloud storage providers to enable true content collaboration. Add your cloud-hosted files to your workspace and they become visual assets that are easily identifiable, moveable, editable, and presentable.

Microsoft Teams

When a problem requires more than a quick message or reference to a single document to be resolved, add your Bluescape workspace as a tab in your Teams channel. Everything is visible at a glance instead of scattered across multiple conversations.

Google Docs and Office365

Sometimes you need to present a document and sometimes you need to collaborate with others on a document. When you add your Google Docs and Office365 files to your workspace, you gain the benefit of working in them in full context.

Get more productivity from your teams and tools

Bluescape integrates with your existing IT investments to help teams visualize the entirety of a project. Create understanding in an instant. Make faster decisions and more effective teams. Bluescape brings everything together, from anywhere.
